## 👤 Profile

Java Full Stack Developer with hands-on experience in building RESTful web applications using Java, Spring Boot, JPA, Hibernate, Angular, and SQL. Experienced in developing end-to-end modules, integrating frontend and backend, and deploying scalable applications. Actively preparing for MNC-level technical roles with a strong focus on Java, DSA, and system fundamentals.

## 🎓 Education

### **B.Tech in Computer Science Engineering** NEWTONS INSTITUTE OF ENGINEERING COLLEGE

2020 – 2024

CGPA:7.47

### **Intermediate**

Govt Junior College Education

2018 – 2020

CGPA:7.07

### **SSC**

ZPH High School

2018

CGPA:8.2

## 🧠 Skills

### **Core Skills**

Java (OOP, Collections, Multithreading, Exception Handling, Java 8), Python(Basics)

### **Backend**

Spring Boot, Spring Security, REST API Design, JWT Authentication, Session Management, Role-Based Access Control (RBAC), JPA, Hibernate, JDBC, Servlets, JSP

### **Frontend**

Angular, HTML, CSS, JavaScript, TypeScript, React (Basics)

### **Web Technologies**

HTML, CSS, JavaScript, TypeScript, Angular, React js

### **Database**

MySQL, PostgreSQL, Oracle, SQL, PL/SQL

### **Operating Systems**

Linux, Windows

### **Tools & IDEs**

Git, GitHub, Postman, IntelliJ, VS Code, Eclipse, JasperReports (Reporting)

## 📁 Projects

### **1. Bank Management System**

- Designed and developed a web-based banking management system to handle core banking operations with secure data handling.
- Implemented CRUD operations using JDBC and MySQL for managing customer accounts, transactions, and account details.
- Developed server-side request handling using Servlets to process business logic and ensure smooth backend operations.
- Built dynamic and user-friendly web pages using JSP for account creation, updates, and transaction workflows.

### **2. Pharma Supply & Consignment Management Platform**

- Developed a full-stack pharma consignment system with dynamic workflow stages, role-based access, and JWT security.
- Implemented multi-tenant architecture using PostgreSQL with separate schemas for different clients, ensuring data isolation and scalability.
- Developed RESTful APIs using Spring Boot, JPA, and Hibernate for consignment entry, verification, warehouse processing, sales orders, and dispatch orders.
- Integrated Angular frontend with backend services for seamless end-to-end functionality and user-level permission management.
- Generated operational and business reports to track consignments, sales, and dispatch status.
- Handled backend WAR deployment and frontend production setup.

## 📜 Certificates

### **Skill Vertex**

Machine Learning With Python Internship,

### **Internshala**

Web Development Certificate In intern Shala Training

## 🏆 Awards

**2nd Place in District-level Volleyball (School)**

**1st Place in Kho-Kho, Vignan Mahotsav Sports Fest (College)**
